Precision Ag.

AGB 110 • Introduction to Precision Ag

13-weeks: Sept. 9 – Dec. 6, 2019

Dual Credit/Enrollment one-credit hour online course providing the introduction to precision agriculture technologies, including applications, terminology, data management, software, hardware and career exploration.

Earn college credit toward the Associate in Applied Science (A.A.S.) Precision Ag Technology degree while in high school.

Eligibility participants must apply and be accepted to Parkland College with a minimum CCS 099 placement.

Learn through hands-on application of precision agriculture technologies through fieldwork, mapping software and online classroom instruction.

Tuition: district 505 students - \$174.00 per credit hour including course fee; out-of-district students - \$255.50 per credit including course fee.

To enroll, contact Early College Services at 217/353-2663 or earlycollege@parkland.edu

Only college in Illinois to offer high school Precision Agriculture course
